

WEBSITE REBEL

The Website Rebel Package is perfect if you are looking for a website that rocks your world, yet is simple to use and manage.

We don't believe in a one-size fits all solution when it comes to websites, so all of our sites are as individual as you are. Our process is designed to get to the heart of what your business is all about, find your voice and create the messages that will attract, enchant and engage your perfect audience - without the need for hustle. Think about it - no hustle, no icky sales talk, just elegant, powerful messages that put your customer at the heart of what you do. Sounds good right!

But even more than that, you want a website you can be proud of, one that will get important people talking. So it's important that you work with someone who understands how important it is for you to get this right. Someone who can gently guide you, listen to what you're saying and turn your ideas into compelling yet intuitive design, and isn't afraid to challenge your perspective on your business. My creative background and agency experience working closely with business owners just like you, means I'll not only deliver content that gets your heart racing (in a good way!) but I'll make this challenging step for you and your business, a joy, I promise.

Our websites are individual builds of WordPress with all the design and plugin functionality you need to achieve your objectives. Whether that is a complex design to corporate brand guidelines, specific design elements within the content, or a high end shop with fully loaded functionality.

So, what do you get in the Website Rebel Package?

- Full design process and custom build
- Up to 7 pages including contact form
- Options for shops, membership sites, directories and much more
- Hands off set up built on a reliable open source platform
- Extendable through plugin system (additional subscription charges may apply)
